About TALIS 2024

The fourth Teaching and Learning International Survey (TALIS 2024) is an international survey that offers the opportunity for teachers and principals to provide input into education analysis and policy development. TALIS is being conducted by the Organisation for Economic Co-operation and Development (OECD). [Name of country], along with more than 50 other countries, is taking part in the survey.

International comparisons from TALIS will allow participants to identify common challenges and to learn from other policy approaches. Principals and teachers will provide information about teaching and learning issues such as their education and professional learning, professional and pedagogical practices, occupational perceptions, and institutional environments and management as well as contemporary issues for education systems such as diversity and equity, social and emotional learning of students, educational uses of technology, and environmental and sustainability education.

In the TALIS study, it is our intention to draw a picture of the different educational practices in all the participating countries. Countries and individuals may differ in their educational approaches. We rely on your expertise to describe your work and opinions as accurately as possible.

Being an international survey, it is possible that some questions do not fit very well within your national context. In these cases, please answer as best as you can.

Confidentiality

All information that is collected in this study will be treated confidentially. While results will be made available by country and, for example, by the type of school within a country, you are guaranteed that neither you, this school, nor any school personnel will be identified in any report of the results of the study. [Participation in this survey is voluntary and any individual may withdraw at any time.]

About the Questionnaire

- <When questions refer to 'this school' we mean by 'school': national school definition.>
- This questionnaire should take between 45 and 60 minutes on average to complete.
- Guidelines for answering the questions are typed in italics. Most questions can be answered by marking the one most appropriate answer.
- When you have completed this questionnaire, please [National Return Procedures and Date].
- When in doubt about any aspect of the questionnaire, or if you would like more information about the questionnaire or the study, you can reach us by using the following contact details: [National centre contact information, phone number and preferably e-mail address]

Thank you very much for your participation!

Professional Learning

In this section, 'professional learning' is defined as activities that aim to develop an individual's skills, knowledge, expertise and other characteristics as a teacher.

Please only consider professional learning you have undertaken after your initial <education or training>.

TQ_Headline_Professional_Learning

17. When you began work at this school, did you take part in any induction activities?

Induction activities' are designed to support new teachers' introduction into the teaching profession and to support experienced teachers who are new to a school.

They are either organised as 'formal induction programmes' such as regular supervision by the principal, reduced teaching load, formal mentoring arrangements with experienced teachers, etc., or as 'informal induction activities', that are unstructured or unplanned activities comprising general introductions to the school and the work, informal peer work with other new teachers, a welcome handbook, etc.

Please mark one choice in each row.

		Yes	No	
a)	I took part in a formal induction programme.	☐ 1	☐ 2	*TT4G17A*
b)	I took part in informal induction activities.	☐ 1	☐ 2	*TT4G17B*

If you answered 'No' to all of the above → Please go to Question [23].

21. Were any of the topics listed below included in your professional learning activities during the last 12 months?

<'Students with special education needs' are those for whom a special education need has been formally identified because they are mentally, physically, or emotionally disadvantaged. Often they will be those for whom additional public or private resources (personnel, material or financial) have been provided to support their education.>

'Environmental sustainability' means meeting the needs of the present without compromising the ability of future generations to meet their own needs. It involves the conservation of natural resources and the protection of Earth's ecological systems. Climate change is one of the main threats to environmental sustainability.

'Artificial intelligence' is the capacity for computers to perform tasks traditionally thought to involve human intelligence. This can include making predictions, suggesting decisions, or generating text.

Education and Environmental Sustainability

The following section includes questions related to environmental sustainability, with an emphasis on climate change.

'Environmental sustainability' means meeting the needs of the present without compromising the ability of future generations to meet their own needs. It involves the conservation of natural resources and the protection of Earth's ecological systems. Climate change is one of the main threats to environmental sustainability.

'Climate change' encompasses global warming but also refers to a broader range of changes, including rising sea levels, shrinking glaciers, accelerated melting of polar ice, and shifts in flower/plant blooming times as well as its impacts on environment, economy, and society.

Teaching in the <Target Class>

In the following, we want to get into more detail about your teaching practices. Within this questionnaire, we cannot cover the whole scope of your teaching. Therefore, we use an exemplary approach and focus on the teaching of one <class>.

The following questions ask you about a particular <class> that you teach. The <class> that we would like you to respond to is the first <ISCED 2011 Level x> <class> that you taught in this school after 11 a.m. last Tuesday. Please note that if you do not teach a <class> at <ISCED 2011 Level x> on Tuesday, this can be a class taught on a day following the last Tuesday.

In the questions below, this <class> will be referred to as the <target class>.

47. We would like to understand the composition of the <target class>. Please estimate the broad percentage of students who have the following characteristics.

This question asks about your personal perception of student background. It is acceptable to base your replies on rough estimates.

Students may fall into multiple categories.

<'Students with special education needs' are those for whom a special education need has been formally identified because they are mentally, physically, or emotionally disadvantaged. Often they will be those for whom additional public or private resources (personnel, material or financial) have been provided to support their education.>

<'Socioeconomically disadvantaged homes' refers to homes lacking the basic necessities of life, such as adequate housing, nutrition or medical care.>

'<Ethnic/national minorities or Indigenous communities>' refer to groups that are a result of historical dynamics and/or shared characteristics that correspond to geographical location and ancestral origins, cultural traditions, religious beliefs, social norms, shared heritage and language, and/or immigrant status and nationality of origin.

An 'immigrant student' is one who was born outside the country. A 'student with migrant background' has parents who were both born outside the country.

'Refugees' are those who, regardless of legal status, fled to another country seeking refuge from war, political oppression, religious persecution, or a natural disaster.
